About me

Currently in the master Business Analytics at the VU in Amsterdam. During my masters I would like to further develop my data science and optimization skills. I am an internationally orientated and driven student who does not hesitate upon new opportunities and challenges.

Skills

(*)[The skill scale is from 0 (Fundamental Awareness) to 6 (Expert).]

Experience

08/2018 Data Analyst Intern Airport Security, Schiphol
Using the data collected during passenger security to provide insight in staffing for the different security filters. The final result included a tool for future analyses and visual inspection to be used by Schiphol. Used: R and Python
